

Fresh Hen Egg Production

Our company is launching a new business line for sustainable raising of laying hens and producing barn eggs.

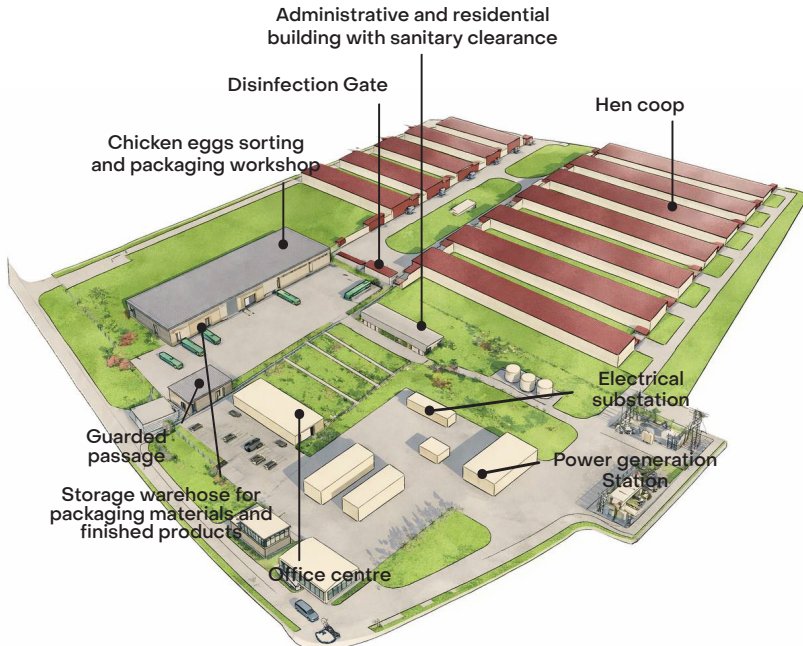

NEW INVESTMENT PROJECT

EXPECTED RESULTS

for the first stage of project implementation
(200 000 laying hens):

- EU quality, sustainability and animal welfare standards
- Strengthening Ukraine' s position in the European egg market and worldwide by supplying barn eggs
- Creation of a modern, innovative and environmentally friendly enterprise based on smart farming principles

The project implementation is planned for five years and foresees launching a production facility with a capacity of two million laying hens kept in Aviary systems complying with barn farming method according to EU/UK standards and regulations.

Project goals and objectives

- Production of high-quality Barn eggs in accordance with the EU standards and regulations
- Fully automatically operated feeding, ventilation, lightning, egg collection and sorting systems
- Satisfying the raising demand for barn eggs in EU and UK and implementing the new trend for farming hens in aviary systems on the domestic market
- Improving animal welfare by providing comfortable conditions and minimising stress for hens

5
